## AKP Projects fall into four categories:

Education

We enable children and young adults to fulfill their potential by providing a supportive learning environment.

Conservation

We partner with communities living on the edge of wilderness, and support strategies to sustain the balance between endangered species, fragile ecosystems and economic opportunity.

Health

We actively support the water, sanitation and other health-related needs of residents within our partner communities.

Enterprise

We support the growth of economic opportunity in our partner communities through training, income generating activities and other innovations to positively impact livelihoods.

# QUALITY ASSURANCE FOLLOW-UP

Well #	502
Donor	Ms. Donor Name
Name of Respondent	Rooas (single mom)
How recipient was getting water before receiving the well	Has a pond by her house that she used to get water from and also used her neighbor's well to get water. But her neighbor did not have a filter and she had to either boil the water or would drink it dirty.
The difference after receiving the well- quotes	"the water tastes good now"
Comments/Status of the well	<p>Pongro Village.</p> <p>The water tastes "good now" because it is bacteria free. Not only is she reducing her risk of diseases she's also now ensuring her children grow up in a healthier environment by drinking clean water.</p> <p>Ms. Rooas was busy taking care of her children and wasn't able to chat for a long time. The well and filter are in good condition. 6 people use the well.</p>
